**The Architecture of Productive Learning Networks**-Lucila Carvalho 2014-03-14 The Architecture of Productive Learning Networks explores the characteristics of productive networked learning situations and, through a series of case studies, identifies some of the key qualities of successful designs. The case studies include networks from a variety of disciplinary and professional fields, including graphic design, chemistry, health care, library science, and teacher education. These learning networks have been implemented in a variety of settings: undergraduate courses in higher education, continuing professional development, and informal networks for creating and sharing knowledge on a particular topic. They are rich in reusable design ideas. The book introduces a framework for analyzing learning networks to show how knowledge, human interaction and physical and digital resources combine in the operation of productive learning networks. The book also argues that learning through interaction in networks has a long history. It combines ideas from architecture, anthropology, archaeology, education, sociology and organizational theory to illustrate and understand networked forms of learning.

**Pursuing Elena**-Sam Cheever 2017-03-11 Elena has no plans for romance. Her plate is full with trying to stay alive, getting to know the new sibling in her life, and solving a murder that seems to have been dropped on the DeVitis family's doorstep. She's spent her entire adult life trying to prove that she's a smart and capable woman who's able to take care of herself. But ultimately, when the danger that's dogged her for as long as she can remember suddenly becomes overwhelming, will Elena need to depend on the man with bedroom eyes and movie star good looks who keeps inserting himself into her life, claiming to have only her safety in mind? Erik didn't ask to be given the job of protecting Elena DeVitis. She's the most stubborn, difficult woman he's ever met. But despite her hard outer shell, and the way she constantly keeps him at arm's length, there's a certain vulnerability in the beautiful heiress's eyes. He knows she's fighting to appear strong and self-sufficient, but he's worried for her life. And beyond that, he's concerned about the feelings between them, which are growing stronger by the moment. A conspiracy, a murder, an ongoing pursuit. Everything seems to be coming to a head. And as it does, members of the DeVitis family will be put into new and deadly situations. And there remains at least one life-changing surprise for them all.

**The Ecological Hoofprint**-Tony Weis 2013-11-14 The exploding global consumption of meat is implicated in momentous but greatly underappreciated problems, and industrial livestock production is the driving force behind soaring demand. Following his previous ground-breaking book *The Global Food Economy*, Tony Weis explains clearly why the growth and industrialization of livestock production is a central part of the accelerating biophysical contradictions of industrial capitalist agriculture. *The Ecological Hoofprint*

provides a rigorous and eye-opening way of understanding what this system means for the health of the planet, how it contributes to worsening human inequality, and how it constitutes a profound but invisible aspect of the violence of everyday life.

**Catholic Social Teaching**-Roger Aubert 2003 Annotation. "During the last years, many meetings, seminars, conferences, and books have been conducted and written to celebrate the hundredth anniversary of Pope Leo XIII's encyclical *Rerum novarum* (May 15, 1891). We hope in this book to give the reader an historical background to this celebration. No other historian in Catholic circles enjoys the reputation of Canon Roger Aubert. Thus, we are presenting ten of his articles that have to do with Catholic social teaching." "These articles give very measured descriptions of the struggles, defeats, and successes that mark the birth of Catholic social teaching. Their reading should produce great wonder and awe at the stance taken by the Church over the last hundred years. That they have not been adhered to and that they are called "our best kept secret" underlines the fact and the struggle that we all have to become truly Christian."--BOOK JACKET. **Emancipating Andie**-Priscilla Glenn 2013 Ever since the one time Andie Weber threw caution to the wind - and paid the price for it - she's learned that it's safer and smarter to live life playing by the rules. Now she's got a great apartment, a steady job, and a wonderful boyfriend in Colin; he's sweet, stable, and essentially perfect - except maybe for the fact that his best friend is Chase. Chase McGuire lives his carefree, unstructured life strictly for himself. Dripping sarcasm and oozing wit, he refuses to censor his feelings or opinions for anyone, making no apologies for either and wearing his abrasiveness like a badge of honor. No one has ever gotten under Andie's skin the way Chase does - and vice versa. So when Andie and Chase find themselves forced to take a two-day road trip together, they are already dreading an inevitable all-out war. But as the trip progresses, and the undeniable friction that has always defined their relationship slowly begins to wear away their preconceived notions of each other, Andie and Chase discover they both have a lot to learn about life, courage, happiness, and the age-old battle between logic and love.

**China's Naval Power**-Yves-Heng Lim 2016-05-23 The rapid modernization of the Chinese Navy is a well-documented reality of the post-Cold War world. In two decades, the People's Liberation Army Navy has evolved from a backward force composed of obsolete platforms into a reasonably modern fleet whose growth is significantly shaking the naval balance in East Asia. The rationale behind China's contemporary rise at sea remains, however, difficult

to grasp and few people have tried to see how the current structure of the international system has shaped Chinese choices. This book makes sense of Chinese priorities in its naval modernization in a 'robust' offensive realist framework. Drawing on Barry Posen's works on sources of military doctrine, it argues that the orientation of Beijing's choices concerning its naval forces can essentially be explained by China's position as a potential regional hegemon. Yves-Heng Lim highlights how a rising state develops naval power to fulfil its security objectives, a theoretical perspective that goes farther than the sole Chinese case.

**Coding, Cryptography and Combinatorics**-Keqin Feng 2012-12-06 It has long been recognized that there are fascinating connections between coding theory, cryptology, and combinatorics. Therefore it seemed desirable to us to organize a conference that brings together experts from these three areas for a fruitful exchange of ideas. We decided on a venue in the Huang Shan (Yellow Mountain) region, one of the most scenic areas of China, so as to provide the additional inducement of an attractive location. The conference was planned for June 2003 with the official title Workshop on Coding, Cryptography and Combinatorics (CCC 2003). Those who are familiar with events in East Asia in the first half of 2003 can guess what happened in the end, namely the conference had to be cancelled in the interest of the health of the participants. The SARS epidemic posed too serious a threat. At the time of the cancellation, the organization of the conference was at an advanced stage: all invited speakers had been selected and all abstracts of contributed talks had been screened by the program committee. Thus, it was decided to call on all invited speakers and presenters of accepted contributed talks to submit their manuscripts for publication in the present volume. Altogether, 39 submissions were received and subjected to another round of refereeing. After careful scrutiny, 28 papers were accepted for publication.

**My Future Is in America**-Jocelyn Cohen 2008-04-05 In 1942, YIVO held a contest for the best autobiography by a Jewish immigrant on the theme "Why I Left the Old Country and What I Have Accomplished in America." Chosen from over two hundred entries, and translated from Yiddish, the nine life stories in *My Future Is in America* provide a compelling portrait of American Jewish life in the immigrant generation at the turn of the twentieth century. The writers arrived in America in every decade from the 1890s to the 1920s. They include manual workers, shopkeepers, housewives, communal activists, and professionals who came from all parts of Eastern Europe and ushered in a new era in American Jewish history. In their own words, the immigrant writers convey the complexities of the transition between the Old and New Worlds. An Introduction places the writings in historical and literary context, and annotations explain historical and cultural allusions made by the writers. This unique volume introduces readers to the complex world of Yiddish-speaking immigrants while at the same time elucidating important themes and topics of interest to those in immigration studies, ethnic studies, labor history, and literary studies. Published in conjunction with the YIVO Institute for Jewish Research.

**DNA Microarrays, Part A: Array Platforms and Wet-Bench Protocols**- 2006-09-11 Modern DNA microarray technologies have evolved over the past 25 years to the point where it is now possible to take many million measurements from a single experiment. These two volumes, Parts A & B in the *Methods in Enzymology* series provide methods that will shepherd any molecular biologist through the process of planning, performing, and publishing microarray results. Part A starts with an overview of a number of microarray platforms, both commercial and academically produced and includes wet bench protocols for performing traditional expression analysis and derivative techniques such as detection of transcription factor occupancy and chromatin status. Wet-bench protocols and troubleshooting techniques continue into Part B. These techniques are well rooted in traditional molecular biology and while they require traditional care, a researcher that can reproducibly generate beautiful Northern or Southern blots should have no difficulty generating beautiful array hybridizations. Data management is a more recent problem for most biologists. The bulk of Part B provides a range of techniques for data handling. This includes critical issues, from normalization within and between arrays, to uploading your results to the public repositories for array data, and how to integrate data from multiple sources. There are chapters in Part B for both the debutant and the expert bioinformatician.

Provides an overview of platforms Includes experimental design and wet bench protocols  
Presents statistical and data analysis methods, array databases, data visualization and meta-analysis
